CipherHealth Rounding Dashboard

Date Filter is previous day   Care Provider is CipherHealth

IP Nurse Leader Rounding

IP Nurse Leader Rounding Overview

This dashboard reflects CipherHealth's goal to round on a certain percentage of patients at least once per day per unit.

Please Note: The default date filter is set to previous day, however you can adjust this to reflect a period of time. It is critical that rounds are documented and submitted near real-time to ensure that all rounds are reported on correctly.

To see data for the care setting you oversee, use the filters up top.

CipherHealth

Daily Rounding Snapshot

Daily Census and Rounding by Facility

› Daily patients present and rounded per facility per day, summed across the selected period in the Date Filter. In this chart, each patient counts once per facility per day, regardless of transfers between units in that facility.

	Facility	Daily Patient Census ⌄	Daily Census Rounded	% Daily Census Rounded
1	CipherHealth Riverside Medical Center	948	163	17.2%
2	CipherHealth Mesa Ridge Medical Center	717	211	29.4%
3	CipherHealth Canyon Vista Medical Center	668	84	12.6%
4	CipherHealth Summit Medical Center	635	22	3.5%
5	CipherHealth Sun Valley Medical Center	411	203	49.4%
6	CipherHealth Pinecrest Medical Center	370	11	3.0%

Daily Census and Rounding by Rounder

› Unique patients rounded on per unit in a given day by rounder. Interactive rounds represent instances where the rounder indicates they were able to speak with a patient or caregiver. This helps to measure if purposeful rounding is taking place where staff are having conversations with the patient or caregiver, not just completing observational rounds or visual sweeps.

	Rounder	Facility	Daily Census Rounded	Daily Census Rounded (Interactive Only)	% Interactive Rounds
1	Megan Holloway	CipherHealth Sun Valley Medical Center	29	25	86.2%
2	Rachel Whitfield	CipherHealth Willow Springs Medical Center	24	17	70.8%

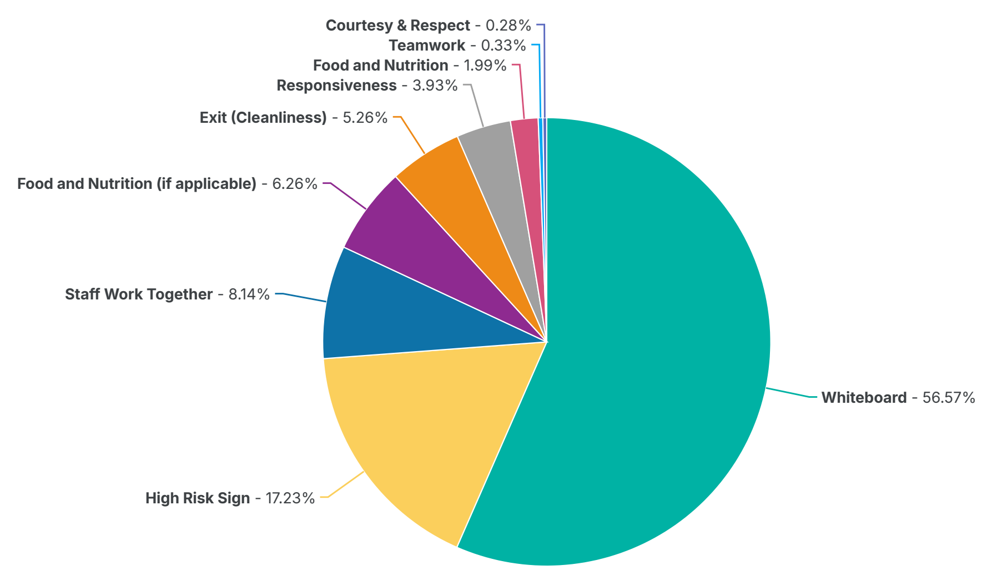
Opportunity Areas and Issues Triggered

Top Opportunity Areas Identified

› Percentage breakdown of opportunity areas (negative responses) by question. Use this to understand where to focus improvement efforts around. Click a slice to drill into response breakdown for that question.



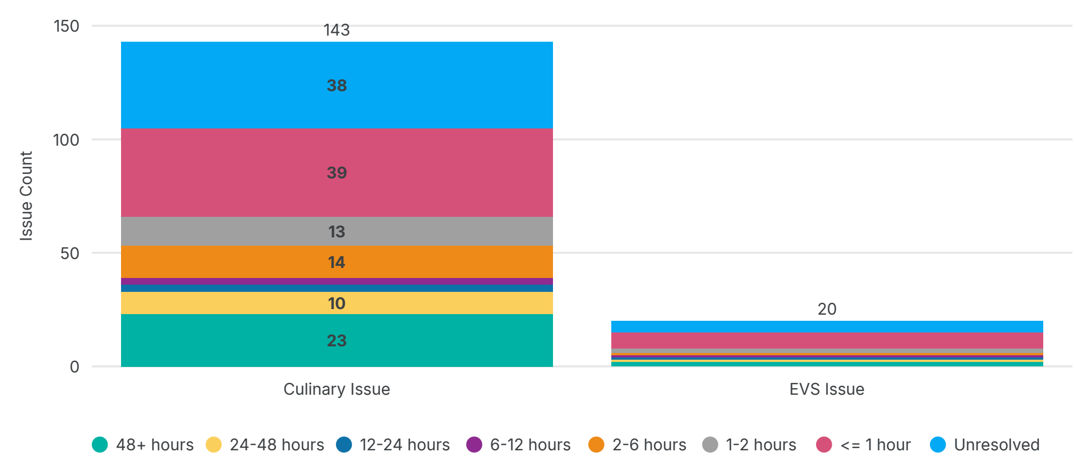
Total Issues Identified

163

⌄ Total number of unique issues triggered from rounds where an alert is sent to staff for resolution and/or to perform service recovery. Please note that not all opportunity areas are associated with an issue. This includes all open and closed issues.

Issue Count by Resolution Time

› Total issues broken down by issue type and resolution time bucket, including unresolved issues. Use this to evaluate if timely service recovery is taking place. Click a segment to drill into issue and patient details.



Daily Census

Daily Patient Census Details

› Results are limited to 5,000 rows. Use Facility and Unit filters and a narrow date range to ensure all matching patients are shown. Each patient present on a given unit on a given day, and whether or not they received a round. Unit arrival time reflects when the patient first arrived or was transferred onto the unit, while unit discharge time reflects when they left the unit (either discharged fully or transferred to another unit.) The round must be completed on the given day and in the given unit to receive a green check box.
